

AGENT SKILL PACK SYSTEM

AI Agent & Skill Packs

For real business workflows, audits, handoffs, and reusable automation.

What you get

12 validated packs
Skill logic, tests, safety

Filled samples
See delivery before order

Client handoff
Reports, notes, checklist

Validated with `npm run preflight`

Built for Fiverr, GitHub, and OpenClaw-style workflows

Not Just Prompts

A complete system for reusable AI agent workflows.

1. Skill Logic

README

SKILL instructions

Trigger rules

Operating workflow

2. Validation

Test cases

Risk checks

Safety boundaries

Preflight proof

3. Delivery

Report templates

Buyer messages

Release notes

Acceptance checklist

Each pack is structured so buyers can inspect, test, and reuse the workflow.

See The Delivery Before You Order

Filled sample outputs show the final handoff style.

AI workflow log debug report

Root cause, evidence, risk, and fix scope

Offer builder plan

Packages, buyer requirements, FAQ, upsell path

AEO search readiness report

Search clarity, FAQ, proof, and conversion edits

Safe Git release report

Risk map, validation, release notes, stop list

Delivery package report

Manifest, usage notes, validation, acceptance checklist

Use the samples to choose the right scope before paying for implementation.

Built For Safe Freelance Delivery

Clear boundaries protect the buyer, seller, and platform.

Included

Redacted inputs

Public repositories

Validation summaries

Buyer handoff notes

Not Included

Passwords, tokens, cookies

Payment, payout, KYC, tax

Wallet or OAuth work

Unscoped private repo access

Guaranteed revenue or ranking

Designed for redacted materials, safe scope, and platform-compliant handoff.

Choose The Right Level

Start small, then expand into a reusable agent workflow system.

Starter

One workflow or one skill idea.

Output

Audit

Scoped pack plan

Next-step checklist

Standard

A reusable business workflow.

Output

Custom pack

Test cases

Delivery template

Buyer handoff notes

Premium

A multi-pack operating system.

Output

Pack bundle

Proof samples

Release and delivery docs

Use diagnosis first, then upgrade only when the scope is clear.
